

## HOW TO FIND AN ALUM

Need questions answered about a potential job, internship, or move across the country? Don't have anyone who you can ask? Use these tooltips to find former and current students who you can connect with.

### FIND THROUGH THE SKILLS EXPLORER

**Skills Explorer found here:** <https://iscareers.byu.edu/careerexplorer.html>

- Switch from Career Explorer tab to the Skills Explorer tab
- Use the dropdown lists
  - Right below the "Skills Explorer" heading to filter out irrelevant data
- Search for relevant organizations
- Find students that match the fields you are trying to find
  - If there is a name, hover on it and see what form of contact they have listed
  - If it simply says "Student" this student has not elected to share their information publicly
- Found a student? Contact them through their listed form of communication. If it says LinkedIn, find them on LinkedIn and send them a message or personalized

connection request. If you can't find a contact for a company you are interested in, come in and visit with Reid to access his connections.

Do not simply use the default connection request, let them know why you're trying to connect with a brief message. See [this link](#) for how to compose LinkedIn connection requests.
